DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of the restriction in the response submitted is acknowledged. The traversal is on the ground(s) that claims 1 and 20 are generic to their related species. This is found persuasive because the dependent claims are in a condition for allowance and will be rejoined with the generic base claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 20 is rejected under 35 U.S.C. 102(b) as being anticipated by Bagalini et al. [US 3,950,715].

Bagalini et al. disclose a method of tripping a circuit breaker comprising:

- flowing a first level of electrical current through a strap [column 3, lines 25-34];
- inducing a magnetic force proportional to the first level of current between a first pole piece and a trip lever [column 2, lines 24-49];
- preventing movement of the trip lever at the first level of current [column 3, lines 37-48]; and
- releasing the trip lever at a second level of current [column 3, line 62-column 4, line 13].

Art Unit: 2832

Allowable Subject Matter

Claims 1-19 are allowed.

Claims 21-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
